EN With the AntiOx wine stopper you can enjoy the taste of fresh wine for up to 10 days after opening the bottle. The built-in activated carbon filter stops the oxidation process and preserves all the organoleptic properties of the wine. Its patented technology is proven scientifically and approved by the best European Sommeliers. For optimal performance, please keep the bottle in vertical position.

FR Le bouchon AntiOx permet de conserver le vin d'une bouteille entamée. Le principe breveté repose sur un charbon actif qui inhibe l'effet oxydant de l'oxygène sur le vin. Plus besoin de pomper, il suffit simplement de boucher la bouteille. Le bouchon AntiOx évite ainsi la formation d'acide acétique qui détériore le vin en lui donnant la désagréable odeur et saveur du vinaigre. Pour une utilisation optimale, maintenir la bouteille en position verticale.

IT Il Tappo AntiOx antiossidante e' fornito di un dispositivo al suo interno composto da un sistema rivoluzionario brevettato che evita l'ossidazione del vino all'interno della bottiglia. Una volta che la bottiglia di vino viene chiusa con il nuovo tappo AntiOx, l'ossidazione del vino si interrompe: il vino non rimane più a contatto con l'ossigeno e non viene più prodotto l'acido acetico che danneggia il vino. Per un ottimo funzionamento mantenere la bottiglia in posizione verticale.

ES El tapón AntiOx contiene en su interior un filtro de carbono activo, especialmente formulado y patentado para evitar la oxidación del vino dentro de la botella.
